

Flock of sheep in an urban Park

Flock of sheep (4 times a year)

- In the wild area of the park
- We don't use machines or gardeners (We save money)
- Sheep fertilize the ground + prevent fires in summer (We save money)
- Lots of families take pictures and kids love it.

Flock of 500 sheep eat all the grass of wild area (250.000 m²) in around 2-3 weeks. Sheep dont get inside urban gardens, only next to river (periurban). They come 4 times a year.
